

Pacific Salmon Foundation Salmon Watersheds Program Data Library Metadata Record

IDENTIFICATION INFORMATION

Citation	
Dataset title	North and Central Coast Stream Escapement Table for Salmon Populations
File name	OUTPUT_NCCStreams_2017.xlsx
Date	2019-05-27
Date type	Publication
Purpose	This dataset was developed by LGL Limited on behalf of the Pacific Salmon Foundation to aid in the assessment of status for North and Central Coast salmon populations. The stream-level data allow patterns in individual sub-populations within Conservation Units to be explored in detail.
Description	This dataset presents information on North and Central Coast salmon Conservation Units from 1954-2017. This dataset includes annual stream-level estimates of spawner abundance. See Challenger et al. 2018 for full details on this dataset (https://salmonwatersheds.ca/library/lib_449/)
Point of Contact	
Individual name	Eric Hertz
Organization name	Pacific Salmon Foundation
Role	Custodian
Email address	ehertz@psf.ca
Descriptive Keywords	
Descriptive Keywords	salmon, escapement, run size

RESOURCE INFORMATION

Resource Constraints	
Use constraints	Please do not distribute
Data quality constraints	Data quality considerations are outlined in English et al. 2018 (https://salmonwatersheds.ca/library/lib_451/)
Lineage	
Lineage statement	This dataset is based on Fisheries and Oceans Canada's New Salmon Escapement Database (NuSEDS).
Source URL	
Resource Maintenance	
Expected Update Frequency	Annually
Equivalent Scale	
Resolution	Conservation Unit
Extent (Temporal)	
Begin date	1954-01-01
End date	2017-12-31
Extent (Geographic)	
Geographic coverage	Regional: North and Central Coast
Other Identification Information	
Language	English
Topic category	Salmon Population Data

Supplementary information

See Challenger et al. 2018 for a detailed description of field names
